CHOMERICS 

## Engineered Custom Injection Molding Solutions

Customers requiring flexible, custom engineered solutions to injection molding challenges choose Webster Plastics for cost-effective answers. Adherence to highest quality standards, responsive customer service, award winning facilities and sixty years of innovation, position Webster Plastics as the leading choice for molding highly engineered materials.

## Key Markets

- Automotive/transportation (ISO/TS 16949 Certified)
- Electrical & electronics
- Consumer appliance
- Industrial, safety
- Medical devices
- Construction
- EMI Shielding

## Materials Expertise

- ABS
- Acetal
- Nylon
- Polyphthalamide
- Polycarbonate
- Polyesters (PBT, PET)
- Polyphenylene Oxide
- Polyether Sulfone
- Polyphenylene Sulfide
- Polypropylene
- Polystyrene
- Thermoplastic Elastomer
- Polyether Imide
- PEEK

## Supporting Services

- Project Management
- Process Monitoring
- Tool Engineering

## Typical Applications

- Transmission parts (automotive, transportation)
- Mechanical parts (hardware, gears, motor housings)
- Engine components (cylinder head covers)
- Electronic components
- Over-molded parts
- Two-shot parts
- Pad printed parts
- Ultrasonic welding
