Atlas Copco

Oil-free rotary screw compressors

ZR/ZT 110-750-FF & ZR/ZT 132-900 VSD-FF

110-935 kW/150-1253 hp

Atlas Copco

Setting the standard in energy efficiency, safety and reliability

Energy, safety & reliability

The shortest route to superior productivity is to minimize operational cost. The Atlas Copco Z compressor series is focused on effectively saving energy, ensuring product safety – only oil-free machines exclude contamination risks for 100% – and guaranteeing the utmost reliability around the clock. And not just today, but day after day, year after year, with minimal maintenance cost, few service interventions and long overhaul intervals.

Choice
Atlas Copco masters each compression principle and offers the most energy efficient technology for the application.

The right drive
Fixed speed machines are fine at full load but when air demand fluctuates, a Variable Speed Drive ensures substantial savings.

VARIABLE SPEED DRIVE

Optimal use
Central control of a multi-compressor installation can reduce the pressure band and achieve the lowest overall energy cost.

ISO CLASS 0

Complete safety
Process, products and environment are safeguarded from contamination. The only air compressors TÜV-certified as "oil-free" (ISO 8573-1 CLASS 0).

Expertise
Since 1903, Atlas Copco's philosophy has been to continually improve our products through intensive R&D, with the aim to maximize the value for our customers.

The integrated design
Internal piping, Variable Speed Drive, 100 % matched components... the only way to ensure total reliability.

Trouble-free installation & commissioning
The ZR oil-free compressor is truly plug-and-play. Put it on a flat floor, connect the power line and the air outlet… and push the start button.

Energy recovery
Heat from compression can be recovered and put to good use in pre-heating of boiler feed water, heating of buildings etc.

Energy

Safety

The professional follow-up
Service Contracts will ensure you of the right maintenance, immediate response and genuine spare parts… all over the globe.

Reliability

ISO 8573-1 CLASS 0
Atlas Copco sets a new industry standard

Class zero

When it comes to clean, oil-free compressed air for your critical processes, you can't afford to compromise. Atlas Copco, a pioneer in oil-free air screw technology, is known for its range of compressors designed especially for applications that require oil-free air.

Now Atlas Copco has achieved a new milestone: Setting the standard for air purity as the first manufacturer to be certified ISO 8573-1 CLASS 0.

Why a new class?

Industries such as pharmaceuticals, food and beverages, electronics and textiles must exclude any risk of contamination. Otherwise severe consequences could follow: spoiled or unsafe products, production downtime and damage to both brand and reputation. To address the needs of critical applications where air purity is essential, the ISO 8573-1 compressed air standard was revised in 2001. Along with a more comprehensive measuring methodology, a new and more stringent class was added to the five existing purity classes: ISO 8573-1 CLASS 0.

First to achieve ISO 8573-1 CLASS 0

As the industry leader committed to meeting the needs of the most demanding customers, Atlas Copco requested the renowned TÜV institute to type-test its Z range of oil-free screw compressors. Using the most rigorous testing methodologies available, all possible oil forms were measured across a range of temperatures and pressures. The TÜV found no traces of oil at all in the output air stream. Thus Atlas Copco not only became the first compressor manufacturer to receive CLASS 0 certification, but also exceeded ISO 8573-1 CLASS 0 specifications.

CLASS	Concentration total oil (aerosol, liquid, vapour) mg/m³
0	As specified by the equipment user or supplier and more stringent than class 1
1	≤ 0.01
2	≤ 0.1
3	≤ 1
4	≤ 5

Atlas Copco eliminates any risk

Only oil-free compressors deliver oil-free air. Whether your activities are in pharmaceutical production, food processing, critical electronics or a similarly exacting industry, it is essential to eliminate risk. That's why you need an Atlas Copco risk-free solution: oil-free screw compressors especially for applications demanding the highest levels of purity. Zero oil means zero risk. Zero risk of contamination. Zero risk of damaged or unsafe products. Zero risk of losses from operational downtime. Above all, zero oil means zero risk of ruining your hard-won reputation.

The most stringent air purity testing available

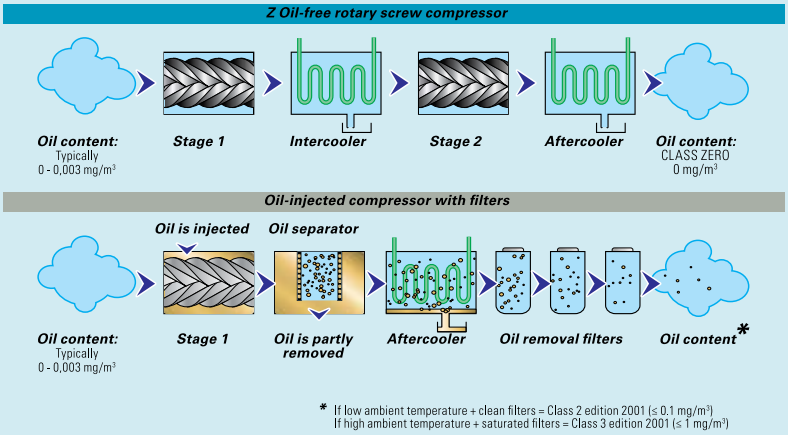
Most manufacturers prefer “partial flow” testing, which targets only the center of the air flow. The Atlas Copco Z range of oil-free screw compressor was tested using the more stringent “full flow” method. This examines the entire air flow to measure aerosols, vapors and wall flow. Even with such rigorous testing, no traces of oil were found in the output air stream.

TÜV (Technische Überwachungsverein/Technical Monitoring Association) reporting on the Atlas Copco Z range of oil-free screw compressors

Can oil-injected compressors with oil removal filters deliver oil-free air?

Often referred to as “technically oil-free air”, this system relies on air cooling devices (e.g. refrigeration dryers) and several stages of oil removal with multiple components. A failure of any of these components or inadequate maintenance can result in oil contamination of a process. Therefore, with oil-injected compressors there will always be a risk of contamination and the possibility of severe consequences for your business.

Move up to a risk-free standard.
Visit www.classzero.com



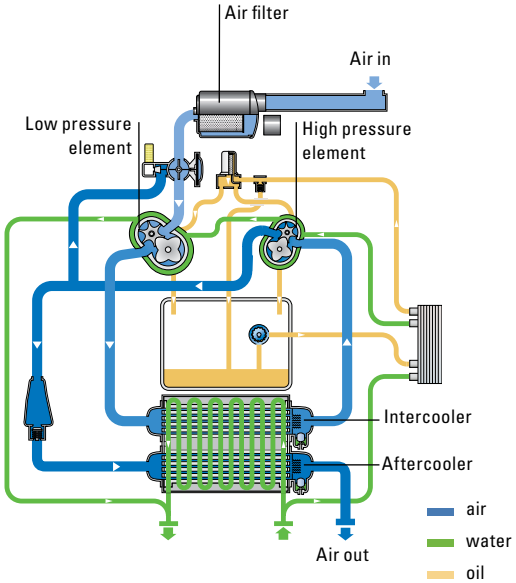
* If low ambient temperature + clean filters = Class 2 edition 2001 (≤ 0,1 mg/m³)
If high ambient temperature + saturated filters = Class 3 edition 2001 (≤ 1 mg/m³)

Proven Z-technology in one complete package

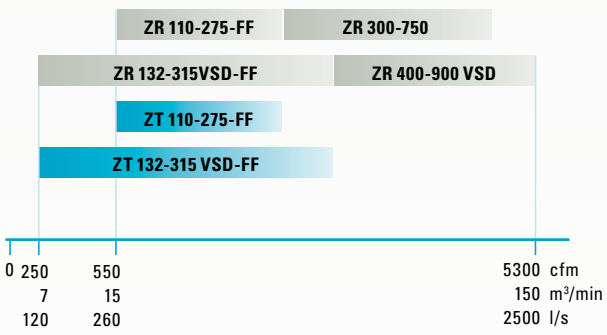
Watercooled ZR 250

1. Advanced Elektronikon control and monitoring system
2. Oil-free screw compression element
3. High efficiency coolers and water seperator
4. Inlet compensators on all piping connections

Watercooled ZR: air/oil/coolant flow



ZR/ZT 110-750-FF and ZR/ZT 132-900 VSD-FF Capacity range (50 & 60 Hz)

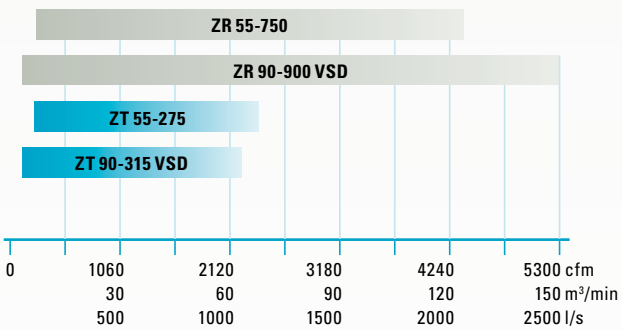


ZT: Aircooled / ZR: Watercooled / VSD: Variable Speed Drive / FF: Full Feature.
See data pages for range details.

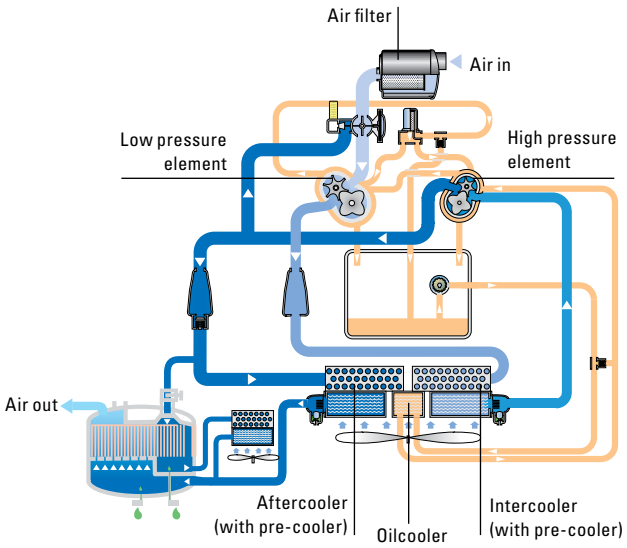
1. Efficient intake air filtration
2. Integrated frequency converter for Variable Speed Drive operation
3. IP55 totally enclosed high efficiency electric motor
4. Built-in IMD adsorption dryer

Aircooled ZT 160 VSD-FF Integrated VSD, Full Feature version with IMD dryer

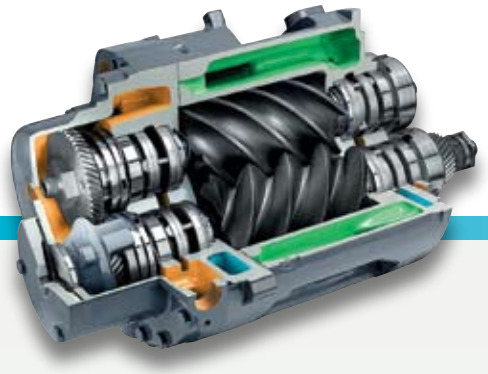
Complete ZR/ZT range



Aircooled ZT-FF: air/oil/coolant flow



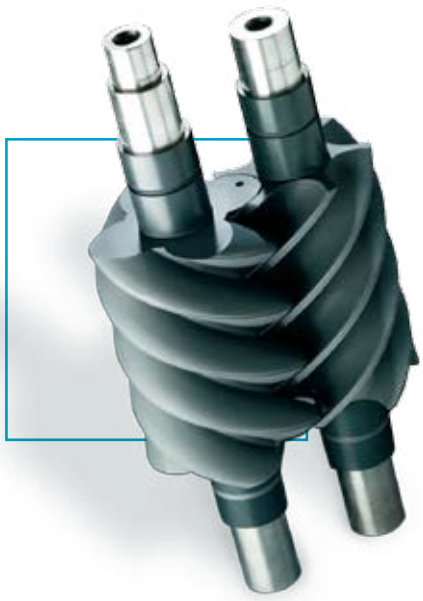
Superior design in every detail



Proven Z-technology

World class oil-free compression element

- unique Z-seal design guarantees 100 % oil-free air
- operation far below critical speed
- high overall efficiency, thanks to:
  - superior rotor coating
  - element cooling jackets
- no oil 'clean up' problems



Superior element bearings

- high stability under varying load conditions
- no need for pre-lubrication/stabilisation time
- bearings operate below wear limit

Reliable element intake protection

- machine mounted, easy to maintain air filter
- minimum intake losses

High precision drive system

AGMA Q13/DIN Class 5 gears

- long lifetime
- low transmission losses
- low noise and vibration

Totally enclosed motor

- IP55 TEFC protection against dust and humidity
- high efficiency

Cooling system designed for life

High efficiency + high reliability water cooling (ZR)

- corrosion resistant stainless steel tubing
- highly reliable robot welding; no risk for leaks
- aluminium star insert increases heat transfer
- cooling water outside tubes guided by baffles
  - no dead zones – limited fouling
  - no degradation in cooler performance
  - easy cleaning
  - very long service intervals

High efficiency + high reliability air cooling (ZT)

- stainless steel pre-cooler with fins
- excellent heat transfer
- easy access for cleaning
- low noise + low energy cooling fans

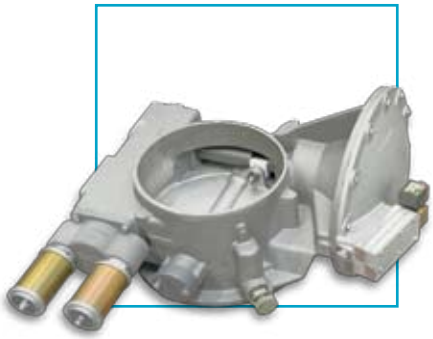
Reliability in every detail

Water separator

- the labyrinth design efficiently separates the condensate from the compressed air
- low moisture carry-over protects downstream equipment:
  - long High Pressure element lifetime
  - better dryer performance

Inlet valve

- air operated diaphragm
- lowest unloaded power by tuning with bypass screw
- mechanical interlock of inlet and blow-off valves



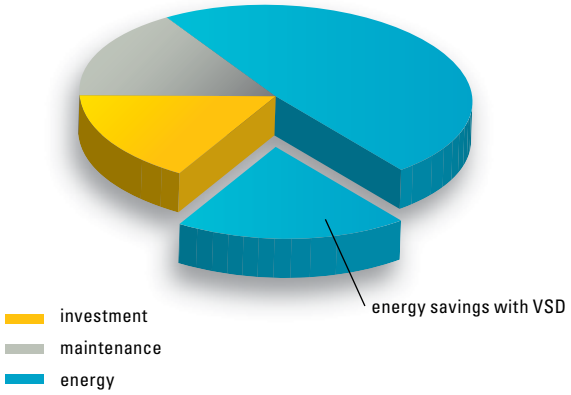
Advanced Elektronikon® control and monitoring system

- overall system performance status with pro-active service indications, alarms for malfunctions and safety shutdowns
- multi-language selectable display
- all monitoring and control functions via one interface
- wide communication possibilities
- integration possible in many process control systems (field bus system)

Why Variable Speed Drive (VSD) compressors?

Direct energy savings of up to 35%

- Unload losses are reduced to a minimum
- No blow-off of compressed air to the atmosphere
- Load/no load transition losses are eliminated
- The precise pressure control of the VSD compressor allows for a tighter pressure band and a lower average working pressure, resulting in reduced energy consumption



Predicting your savings

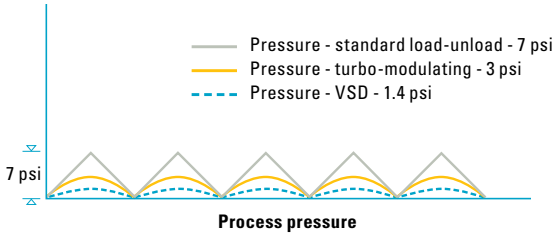
Call upon the expertise of Atlas Copco specialists and have an assessment carried out in your factory. A detailed report will show your current operation and the achievable savings when adding a VSD solution to your compressed air system.

Indirect energy savings

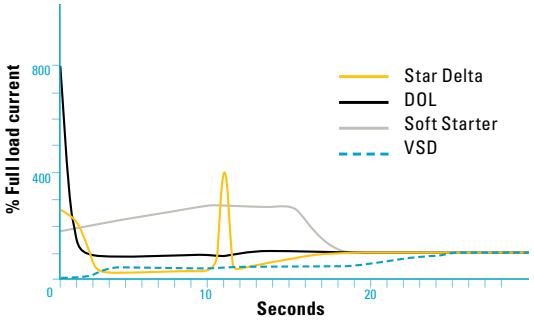
- The lower system pressure obtained by VSD results in up to 10% additional yearly savings:
  - lower energy consumption of (other) base load machines
  - leak losses are significantly reduced: e.g. leakage at 87 psi is 13 % lower than at 102 psi
  - most compressed air applications consume less air at a reduced pressure

Additional VSD benefits

- **The stable system** pressure provides stability for all processes using compressed air.

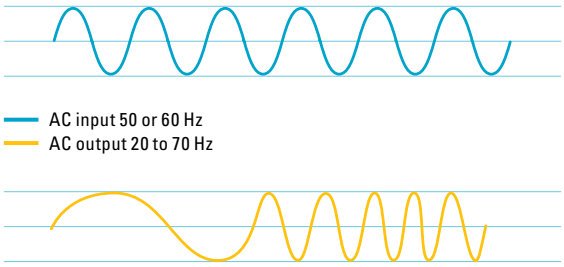


- **No current peaks** during start-up
  - unlimited starting and stopping
  - no risk of current peak penalties upon starting

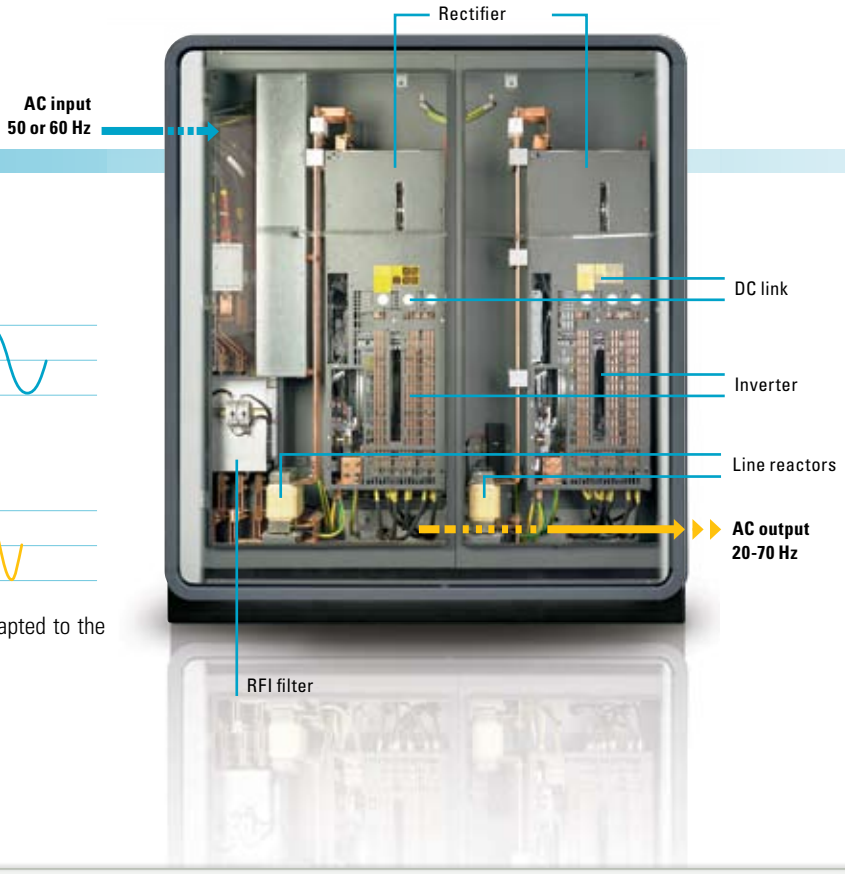


- Savings in electrical installation - smaller breakers, fuses, transformers and cables.

The magic of VSD



The frequency of the drive motor is continuously adapted to the fluctuating air demand.



Integrated VSD - The only way

1 Elektronikon® controls compressor and inverter
- maximum machine safety
- easy networking of the compressor

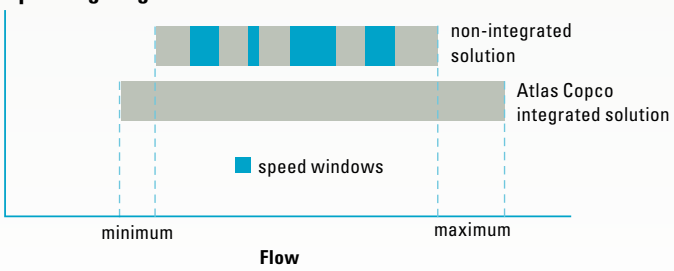
2 EMC tested and certified
- maximum operating range
- no influence of external sources
- no emissions to other equipment

3 Motor specifically designed for VSD
- bearings protected against induced bearing currents
- motor & converter perfectly tuned to obtain best efficiency over entire speed range
- optimized cooling air flow

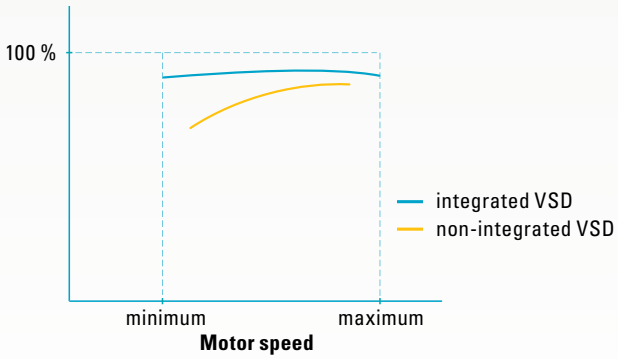
4 Mechanical enhancements
- proper lubrication to gears and bearings for all speeds
- all components operate below critical vibrations

5 Tested over complete speed range
- elimination of "speed windows", ensuring stable pressure and consistent energy savings

Operating range



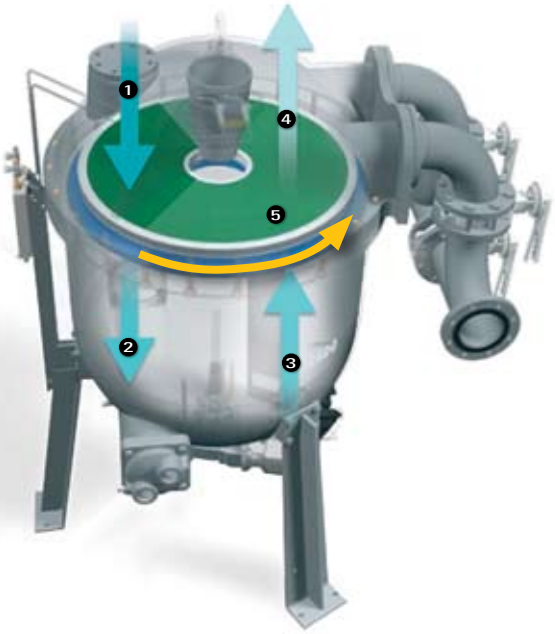
Combined motor/converter efficiency



The Full Feature compressor – a compact, all-in-one quality air solution

Dry compressed air out of the box

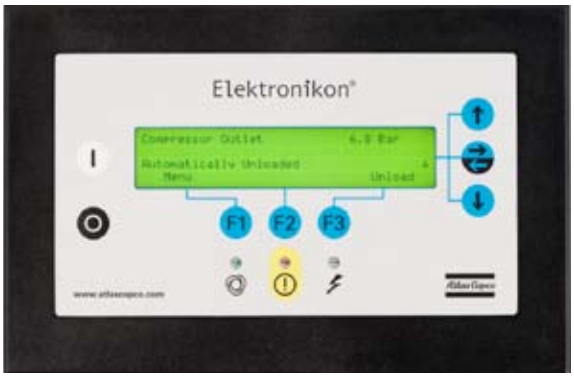
- The Full Feature concept is a total installation, providing dry compressed air. Integrating the IMD dryer and its Variable Speed Drive on VSD models, this compact package offers high quality air at the lowest cost.
- The IMD adsorption dryer eliminates the moisture before it enters the air net, ensuring a reliable process and an impeccable end product.
  No external energy is needed to dry the air, resulting in large savings.
- The pressure drop through the dryer is minimal, which again cuts down the operating cost.
- The IMD dryer needs **no purge air:** no compressed air is wasted.
- The Full Feature compressor is a pre-wired and pre-piped solution, ready to use.



The IMD drying principle

1. Hot unsaturated air
2. Hot saturated air
3. Cold saturated air
4. Dry air
5. Drying section

Watercooled
ZR 160 VSD-FF



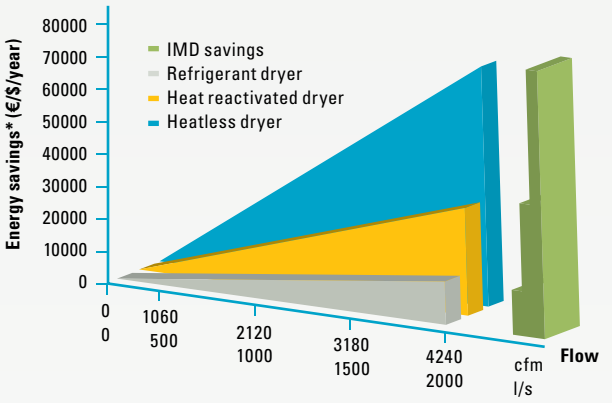
Overall system control and monitoring

- One integrated control system for compressor and dryer
- Monitoring of the IMD dryer includes:
  - Temperature readings of
    - IMD dryer inlet and outlet
    - regeneration air inlet and outlet
    - mix air inlet
  - Pressure dewpoint after the IMD (option)
  - Loading reporting of dryer

Energy savings with Full Feature/MD

Direct savings

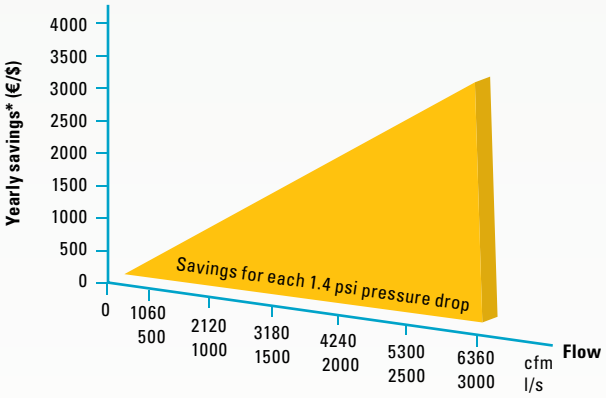
The IMD drying process requires no external energy; over time this results in large savings.



* Assumptions: 1kWh = 0.05 €/$ – 8000 h/year

Indirect savings

Other than direct energy input, the pressure drop in dryers causes indirect energy consumption as well. IMD dryers have a very low pressure drop, which leads to a further reduction in energy cost.



Custom*Design*

The answer to every non-standard question

The new generation of Z-compressor is designed as standard to perform in a wide range of operating and site conditions.

However some environments call for additional measures. For all those special requests Atlas Copco's Custom *Design* department offers an adequate solution.

- **Customizing** the standard products to fit your local plant standards. Meeting these standards on electrical voltage, color coatings, explosion proof zones, documentation, test and inspection requirements…
- **Designing** products to secure operation in harsh environments. Allow outdoor installation in sub-zero temperatures, increase corrosion resistance for windy coastal and off-shore applications or ensure performance in hot, moist or dusty environments…
- **Extending** the range to nitrogen compressors and booster units to suit your specific application…

All this of course retaining the high standards on energy, safety and reliability, inherent to all Atlas Copco products.

With dedicated teams in both Product Companies and Regional Engineering Centers Custom*Design* offers close-to-home solutions fitting your applications world-wide.

Global presence – local service

Our Aftermarket product portfolio is designed to add maximum value for our customers by ensuring the optimum availability and reliability of their compressed air equipment with the lowest possible operating costs.We deliver this complete service guarantee through our extensive Aftermarket organization, maintaining our position as the leader in compressed air.

The perfect match for your needs

Z-compressors

The new generation of Z-compressors provides unprecedented freedom to select the right features for your specific needs.
The compressor you want is the compressor we build.

Z Pressure

- ☐ 50 Hz:
  - ☐ 7.5 bar
  - ☐ 8.6 bar
  - ☐ 10 bar
  - ☐ 13 bar (only on ZR145/250/275)
- ☐ 60 Hz:
  - ☐ 100 psi / 7 bar
  - ☐ 125 psi / 8.6 bar
  - ☐ 151 psi / 10.4 bar
  - ☐ 189 psi / 13 bar (only on ZR145/250/275)

Z Capacity (power)

- ☐ 150 Hp (fixed speed)
- ☐ 175 Hp (VSD - Variable Speed Drive)
- ☐ 200 Hp (fixed speed & VSD - Variable Speed Drive)
- ☐ 250 Hp (fixed speed)
- ☐ 300 Hp (fixed speed & VSD - Variable Speed Drive)
- ☐ 350 Hp (fixed speed)
- ☐ 400 Hp (fixed speed & VSD - Variable Speed Drive)
- ☐ 450 Hp (fixed speed)
- ☐ 500 Hp (fixed speed & VSD - Variable Speed Drive)
- ☐ 600 Hp (fixed speed)
- ☐ 700 Hp (fixed speed & VSD - Variable Speed Drive)
- ☐ 800 Hp (fixed speed)
- ☐ 900 Hp (fixed speed)
- ☐ 938 Hp (VSD - Variable Speed Drive)
- ☐ 1253 Hp (VSD - Variable Speed Drive)

Z Cooling

- ☐ ZR: watercooled
- ☐ ZT: aircooled (up to 400 Hp)

Z Motor drive

- ☐ Fixed Speed Drive
- ☐ Variable Speed Drive (VSD) - saving up to 35% in energy costs

Z Dryer

- ☐ MD dryer for dry air at no energy cost:
  - ☐ integrated IMD for Z 110-275 and Z 132-315 VSD
  - ☐ free-standing MD for ZR 300-750 and ZR 400-900 VSD
- ☐ BD/XD dryer for very dry air
- ☐ Compressor without dryer

Z In/outdoor

- ☐ Standard package for indoor use
- ☐ Outdoor variant mounted in a standard container (up to 400 Hp)

Z Ambient temperature

- ☐ Standard machine: operating range between 32 and 104 °F
- ☐ HAT (High Ambient Temperature) version: operating range between 32 and 122 °F
- ☐ Winterization option: temperatures to -4 °F (only on outdoor variant)

Complete scope suiting all needs

Features and benefits

Numerous features are included as standard. Some applications may also need or benefit from one of the factory installed options.

Standard

☑	Air intake filter and silencer	☑	Complete oil circuit pre-piped
☑	Air intake flexible	☑	Built-in oil breather system
☑	Stainless steel inter and aftercooler cores *	☑	AGMA class 13, DIN class 5 gears
☑	Outlet air silencer	☑	Electric IP 55 motors pre-mounted **
☑	Six sided silencing canopy	☑	Starters **
☑	Terminal expansion joints – air and water side	☑	Pre-mounted electrical and VSD cubicles
☑	Outlet air flange	☑	Skid with no need for foundations
☑	Complete water circuit *	☑	Suppression of emissions/harmonic distortions in VSD
☑	Single point inlet and outlet cooling water connection *		
☑	Back-flush arrangement for cooler cleaning *		

* Only for watercooled versions
** Standard on LV, optional on MV
*** Option on ZR 300-750

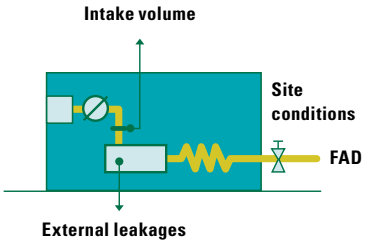
Technical data

True performance

Atlas Copco Z-compressors are measured according to ISO 1217, Annex C, Edition 3, stipulating the FAD (Free Air Delivery) measurement at the outlet of the package, net of all losses.

Atlas Copco specifications correspond to the capacity and pressure that are effectively available to the user, not to the air volume that is sucked in. Differences can be substantial.



Reference conditions

(1) Reference conditions:
- Dry air
- Absolute inlet pressure 14.5 psi(a)
- Cooling and air intake temperature 68 °F
- Nominal working pressure:
  - 102 psig for 102, 109 and 125 psig
  - 131 psig for 145 and 151 psig variants
  - 174 psig for 184 psig variants
- Z VSD: 5 % derating for 380V nets
- Capacity of the compressor package measured according to ISO 1217, Third Edition, Annex C

(2) Cooling water temp. rise of 27 °F (18 °F for FF)

(3) Pressure dewpoint is specified for
- 68 °F cooling air/water temperature
- relative humidity of 60 %
- nominal working pressure
- load level of minimum 50 %

(4) ± 3 dB(A) according to ISO 2151:2004 and using ISO 9614-2

Conversions
- 1 kg = 2.2 lbs
- 1 mm = 0.039 inch
- °F = °C x 9/5 + 32

(1) Reference conditions:
- Dry air
- Absolute inlet pressure 14.5 psi(a)
- Cooling and air intake temperature 68 °F
- Nominal working pressure:
  - 102 psig for 102, 109, and 125 psig variants
  - 131 psig for 145 and 151 psig variants
  - 174 psig for 189 psig variants
- Z VSD: 5 % derating for 380V nets
- Capacity of the compressor package measured according to ISO 1217, Third Edition, Annex C

(2) Cooling water temp. rise of 27 °F (18 °F for FF)

(3) Pressure dewpoint is specified for
- 68 °F cooling air/water temperature
- relative humidity of 60 %
- nominal working pressure
- load level of minimum 50 %

(4) ± 3 dB(A) according to ISO 2151:2004 and using ISO 9614-2

- Nominal working pressure:
  - 102 psig for 102, 109, and 125 variants
  - 131 psig for 145 and 151 psig variants
- Z VSD: 5 % derating for 380V nets
- Capacity of the compressor package measured according to ISO 1217, Third Edition, Annex C

(2) Cooling water temp. rise of 27 °F (18 °F for FF)

(3) Pressure dewpoint is specified for
- 68 °F cooling air/water temperature
- relative humidity of 60 %
- nominal working pressure
- load level of minimum 50 %

(4) ± 3 dB(A) according to ISO 2151:2004 and using ISO 9614-2

What sets Atlas Copco apart? Our belief that, to excel, we must provide the best possible know-how and technology in ways that our customers value. Whether we're fully supporting existing products or advancing technology through innovation, we constantly focus on customer needs.

The Atlas Copco way of doing business grows from ongoing interaction, long-term relationships, and a commitment to understanding each customer's process and objectives. As a result, every compressed air solution we create helps a customer operate with greater efficiency, economy, and productivity.

Satisfying customer needs effectively has made Atlas Copco the number one compressor manufacturer in the world. We will continue to attract new business through our unwavering conviction to creating products and ideas that help our customers succeed.
